

# Menstrual Spotting

## Testing Checklist

- Pregnancy test (blood or urine)
- Complete blood cell count with hemoglobin, hematocrit and platelets
- Ferritin - rule out iron deficiency anemia
- Thyroid stimulating hormone (TSH)
- Prolactin
- Testosterone and DHEAs - is PCOS is suspected
- Sexually transmitted infection screen - chlamydia and gonorrhea
- Pelvic or transvaginal ultrasound to evaluate health of uterine lining and look for hyperplasia, carcinoma, fibroids and polyps
